

# INTERNATIONAL SEARCH REPORT

International application No.  
PCT/AU03/01296

<b>A. CLASSIFICATION OF SUBJECT MATTER</b>																						
Int. Cl. 7: A61K 31/12, 31/352, 31/353, 31/555, 33/24, A61P 35/00, C07F 15/00																						
According to International Patent Classification (IPC) or to both national classification and IPC																						
<b>B. FIELDS SEARCHED</b>																						
Minimum documentation searched (classification system followed by classification symbols)																						
Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched																						
Electronic data base consulted during the international search (name of data base and, where practicable, search terms used) STN On-line Files MEDLINE, CA, WPIDS, BIOSIS Keywords# dehydroequol, platin?, cisplatin?, carboplatin?, isoflav?, genistein, daidzein, flavan?, flavon?, platin?, cisplat? STN Substructure Search																						
<b>C. DOCUMENTS CONSIDERED TO BE RELEVANT</b>																						
Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.																				
X	STN File Medline, abstract accession number 2001088116 & KHOSHYOMN S. et al., Pediatric Neurosurgery (2000 September), 33 (3), 123-31 "Synergistic action of genistein and cisplatin on growth inhibition and cytotoxicity of human medulloblastoma cells".	1-15																				
X	STN File Medline, abstract accession number 97367506 & CALTAGIRONE S. et al., American Journal of Respiratory Cell and Molecular Biology, (1997 July) 17 (1) 51-9, "Interaction with type II estrogen binding sites and antiproliferative activity of tamoxifen and quercetin in human non-small-cell lung cancer".	1-12, 14, 15																				
<input checked="" type="checkbox"/> Further documents are listed in the continuation of Box C <input checked="" type="checkbox"/> See patent family annex

## INTERNATIONAL SEARCH REPORT

International application No.

PCT/AU03/01296

### Box I Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1.  Claims Nos :  
because they relate to subject matter not required to be searched by this Authority, namely:
  
2.  Claims Nos : **1-15, 16-19**  
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:  
(i) as claims 1-15 are broadly drafted it is not economically possible to search the full scope of the claims. With due consideration to the examples, the search was limited to the isoflavones, and  
(ii) claims 16-19 are directed to platinum-isoflavanoid complexes of formula (II), wherein the isoflavanoid ligand is as exemplified in the specification (compounds 1-30 on pages 19-22);
3.  Claims Nos :  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a)

### Box II Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

1.  As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims
2.  As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3.  As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
  
4.  No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

#### Remark on Protest

- The additional search fees were accompanied by the applicant's protest.  
 No protest accompanied the payment of additional search fees.

## PATENT COOPERATION TREATY

## PCT

## INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference 78273853	<b>FOR FURTHER ACTION</b>	see Notification of Transmittal of International Search Report (Form PCT/ISA/220) as well as, where applicable, item 5 below.
International application No. <b>PCT/AU03/01296</b>	International filing date ( <i>day/month/year</i> ) <b>2 October 2003</b>	(Earliest) Priority Date ( <i>day/month/year</i> ) <b>2 October 2002</b>
Applicant <b>NOVOGEN RESEARCH PTY LTD et al</b>		

This international search report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This international search report consists of a total of 8 sheets.

It is also accompanied by a copy of each prior art document cited in this report.

1. **Basis of the report**

- a. With regard to the language, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
  - the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).
- b. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international search was carried out on the basis of the sequence listing:
  - contained in the international application in written form.
  - filed together with the international application in computer readable form.
  - furnished subsequently to this Authority in written form.
  - furnished subsequently to this Authority in computer readable form.
  - the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
  - the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished

2.  Certain claims were found unsearchable (See Box I).

3.  Unity of invention is lacking (See Box II).

4. With regard to the title,  the text is approved as submitted by the applicant.

the text has been established by this Authority to read as follows:

5. With regard to the abstract,  the text is approved as submitted by the applicant

the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.

6. The figure of the drawings to be published with the abstract is Figure No.

as suggested by the applicant.

None of the figures

because the applicant failed to suggest a figure

because this figure better characterizes the invention

## INTERNATIONAL SEARCH REPORT

International application No.

PCT/AU03/01296

**Box I Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)**

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1.  Claims Nos :

because they relate to subject matter not required to be searched by this Authority, namely:

2.  Claims Nos : **1-15, 16-19**

because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

- (i) as claims 1-15 are broadly drafted it is not economically possible to search the full scope of the claims. With due consideration to the examples, the search was limited to the isoflavones, and
- (ii) claims 16-19 are directed to platinum-isoflavanoid complexes of formula (II), wherein the isoflavanoid ligand is as exemplified in the specification (compounds 1-30 on pages 19-22);

3.  Claims Nos :

because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a)

**Box II Observations where unity of invention is lacking (Continuation of item 3 of first sheet)**

This International Searching Authority found multiple inventions in this international application, as follows:

1.  As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims
2.  As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3.  As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4.  No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

**Remark on Protest**

The additional search fees were accompanied by the applicant's protest.

No protest accompanied the payment of additional search fees.

## INTERNATIONAL SEARCH REPORT

International application No.

PCT/AU03/01296

**A. CLASSIFICATION OF SUBJECT MATTER**Int. Cl. <sup>7</sup>: A61K 31/12, 31/352, 31/353, 31/555, 33/24, A61P 35/00, C07F 15/00

According to International Patent Classification (IPC) or to both national classification and IPC

**B. FIELDS SEARCHED**

Minimum documentation searched (classification system followed by classification symbols)

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

STN On-line Files MEDLINE, CA, WPIDS, BIOSIS Keywords# dehydroequol, platin?, cisplatin?, carboplatin?, isoflav?, genistein, daidzein, flavan?, flavon?, platin?, cisplat? STN Substructure Search

INTERNATIONAL SEARCH REPORT  
Information on patent family members

International application No.  
**PCT/AU03/01296**

This Annex lists the known "A" publication level patent family members relating to the patent documents cited in the above-mentioned international search report. The Australian Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
